

MANTRA, SURAT.

Water Awareness Program for Mill Workers

MANTRA has designed a Water Awareness program for process houses workers. The program is conducted in Hindi language. The program consists of one hour presentation with the help of video and power point slides. The program intends to educate workers for water scarcity and why its efficient use is important to society and the industry.

MANTRA has already conducted this program in few process houses of GIDC Pandesara. The process houses where this program is conducted have found this program very useful and it has helped them in better water management. We wish that this program is conducted in every process house of Surat to spread the message of importance of water and its efficient usage.

The program can be conducted a day before holiday at about 7.00 pm or on the day mill starts after holiday i.e. in morning at about 9.00 a.m. generally a group of about 100 person comprising of machine operators of jet, drum would be ideal.

For arranging above program in your process house kindly contact Mr. Munjal Parikh, contact no. 9825495220. Alternately drop an e mail in the name of Dr. S.K. Basu, Director MANTRA director@mantrasurat.org Further information is also available on mantra wbsite.
